DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17, 28, and 30-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons independent claims 1 and 28 are considered distinguished from the prior art is the inclusion of the limitation that the copper oxide is reduced to copper by removal of the oxygen without also removing the copper of the copper oxide, in the context of the claim wherein the process is to prepare copper for the deposition of silicon carbide or silicon oxycarbide (claim 2) to give better adhesion. By contrast, Donnelly teaches that copper oxide is removed --not just the oxygen from the copper oxide-- by the organic vapors of the β -diketone.

The reasons for allowing independent claims 6 and 7 can be found in the Office action filed 15 December 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
